CarePlus™
RTLS Solutions

What is RTLS?

Real-time location system (RTLS) tracking provides 100%, room accurate location services for assets and/or people in real time. All indoor area tracking problems are solved to help reduce capital expenditure. Even contained outdoor areas are covered. RTLS delivers significant opportunities to benefit healthcare facility's administration, stakeholders, staff, patients, and their friends and families. An added bonus is just how cost-effective these solutions are.

CarePlus™ Mobile Staff Duress

CarePlus™ Mobile Staff Duress was designed to reduce risk and provide accelerated emergency response times for any staff member facing possible duress. The easy-to-use tag and scalable, wall mounted devices send instant signals for precise room locations to detect and direct immediate assistance.

Mobile Staff Duress represents a staff member requiring immediate assistance

CarePlus™ Asset Tracking

CarePlus™ Asset Tracking was designed to manage the location of important and costly equipment. RTLS technology not only assists the reduction of time wastage searching for lost equipment; it also improves wait times for patients, enables faster bed turnaround, facilitates quick maintenance and testing, and generates significant return on investment. Such equipment CarePlus™ Asset Tracking protects includes wheelchairs, ECG monitors, mobile x-ray units, IV pumps, laptops, ultrasound units, stretchers, respiratory machines, patient monitors, and more.

CarePlus™ Mobile Resident Call

CarePlus™ Mobile Resident Call was designed to empower residents and provide extra caregiving time for staff with a portable assistance device for residents. A simple and customisable mobile call device alerts for instant help or assistance, carried via a robust lanyard to deliver comprehensive communication between residents and staff. This can be easily translated for patient tracking in acute care facilities.

Features & Benefits

- Secure, robust, innovative.
- Resource optimisation to save time and money.
- Values safety, significantly reducing risk to people and assets.
- Effective, trusted, functional and customised solutions.
- Peace of mind with an increased sense of security.
